

CONFIDENTIALNPIC/TDS/D-688-67
14 February 1967

MEMORANDUM FOR: Chief, Technical Intelligence Division, NPIC

25X1 SUBJECT : Evaluation of [] Proposal to Study the Sources of Human Errors in Mensuration.

25X1 1. Attached is that portion of the Human Factors Proposal (for FY 67) which deals with mensuration. Also attached is a 5-year projection of what [] believes to be required research in mensuration as it is affected by the operator.

2. It is requested that TID review and evaluate these documents to determine: (a) if the various proposed tasks represent real requirements for research; (b) their relative importance; (c) if they are duplicative of past or current research; (d) other specific or general comments or suggestions about the proposed tasks.

3. It is also requested that TID recommend to TDS which, if any, of the tasks proposed for FY 67 should be funded. If there are other tasks which TID considers more important or more timely than those proposed for FY 67, TDS would appreciate your recommendations.

25X1 4. It would be appreciated by TDS if your review and recommendations could be accomplished by 24 February. Please contact [] ext. [] if you require additional information. 25X1
